

# Nanoscale and Microscale Heat Transfer V

September 26-30, 2016  
Santorini, GREECE

Eurotherm Seminar No 108

## About EUROTHERM

The EUROTHERM Committee was formed in Brussels on 16 October 1986 following an initiative taken at the 8th International Heat Transfer Conference in San Francisco earlier that year. The aim of EUROTHERM is to promote and foster European cooperation in Thermal Sciences and Heat Transfer by gathering together scientists and engineers working in specialised areas.

## Venue

The Eurotherm seminar 108 is organized by LEMTA under the auspices of Société Française de Thermique and will be held at the Petros M. Nomikos Conference Centre situated at Fira, the capital of Santorini island in GREECE.

Fira is known for its unique view over the caldera and the volcano of Santorini, with a history over 4000 years. Santorini is one of the most beautiful islands of archipelago of Cyclades, situated in the southern Aegean Sea. Santorini is located approximately 200 km (120 miles) southeast of Athens. It can be easily accessed by plane (direct flights from Athens, and a lot of European cities: London, Brussels, Zurich, Vienna, Paris, Oslo, Amsterdam).
